

COMMAND VEHICLE

EmmertCrewVan

Whether a major event or a catastrophic accident: the EmmertCrewVan command vehicle will provide you and your team with optimal working conditions so that every job can be brought to a positive conclusion in a targeted, confident, efficient and safe manner. The functions of an EmmertCrewVan command vehicle depend on the actual mission and the aid organisation that is using it. First and foremost, it serves to transport the operations managers and their gear, to provide equipment for reconnaissance and guidance, and to handle radio communications with the deployment site and radio communications between the site and a higher-level management body.

EmmertCrewVans command vehicles, built pursuant to DIN 14507, are equipped with the latest IT, EDP and communication technology. Our vehicles are constantly being improved – based on the experience of our employees and customers. You are actively involved in the design of your Emmert command vehicle, so that it is tailormade for your work and so that you are in control of every situation.

We perform the modifications for our EmmertCrewVans command vehicles independently of the vehicle manufacturer. We are also not bound to specific manufacturers with regard to IT and communication solutions.
