

RESCUE VEHICLES

Rescue and Evacuation Vehicle EmmertRescue II Typ B

Our RTW EmmertRescue II is equipped pursuant to DIN EN 1789 Type B. This rescue vehicle from the Emmert-Rescue range allows the optimal care and stabilisation of the patient as well as the subsequent transport. The EmmertRescue II is equipped with immobilisation equipment, a state-of-the-art Stryker power-load system as well as state-of-the-art diagnostic and first aid equipment. The EmmertRescue II has sophisticated solutions for electronics and electrical engineering. The interior is elaborately designed so that intuitive working in the vehicle is ensured.
