

RESCUE VEHICLES

EmmertRescue III Type C

Our EmmertRescue III rescue vehicle is based on an Emmert sandwich-box construction with equipment pursuant to DIN EN 1789 Type C.

As a result, EmmertRescue III is built on a large scale, so as to master any emergency rescue. The extensive furnishing with professional medical equipment allows any emergency situation or escalation to be mastered. The comfortable and low-maintenance hydraulic ambulance table with a high-quality stretcher or a Stryker power-load system as well as various immobilisation aids minimise the strain on the emergency paramedic and the patient.

Technical specifications:

Basis vehicles: Mercedes Benz Sprinter,
Volkswagen Crafter, Ford Transit

Types of vehicles: Chassis starting at 3665 mm wheelbase and
total weight starting at 5.0 t

Sandwich construction:

The suitcase constructions for our RTW EmmertRescue III are manufactured inhouse. These are suitable for the command vehicle II EmmertCrewVan II, the EmmertMobileCare universal mobile units and intensive care wagons.

A special modification of the model RTW Emmert-Rescue III is the model with its own self-constructed 4 carrying-storage.

We would be glad to inform you about the unique features of our RTW EmmertRescue III.
